that dogs prefer

It won't wash off

Dogs can be handled immediately

Customer satisfaction guaranteed

Available from your local veterinarian now  
*The treat your dogs will LOVE!*

### Chew Sizes

NEXGARD is available in four flavoured chew sizes:

	<b>Very Small Dog 2-4kg</b>
	<b>Small Dog 4.1-10kg</b>
	<b>Medium Dog 10.1-25kg</b>
	<b>Large Dog 25.1-50kg</b>

For dogs weighing over 50kg administer appropriate combination of whole chewables

NEXGARD contains afoxolaner, a revolutionary new active ingredient that causes uncontrolled activity in the flea and tick's central nervous system resulting in their death.

NEXGARD soft chews are designed for ease of administration.

Created with soy proteins and braised beef flavouring, NEXGARD features a chewy texture, rich brown colour, and beef aroma that makes it easy to give.

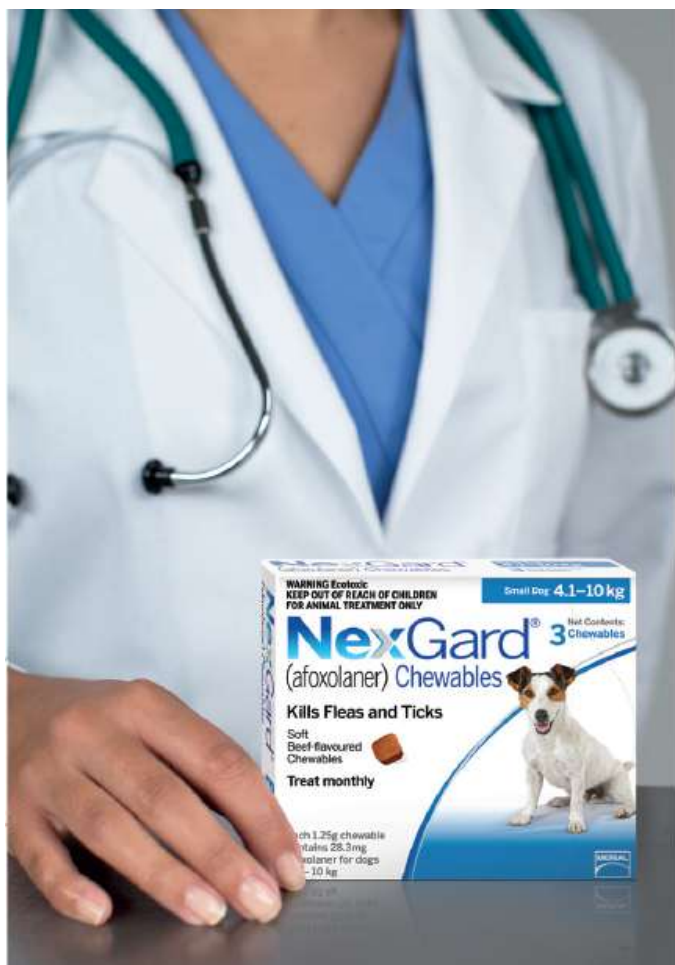

Because it is a vegetable-based, meat-less chew that uses beef flavouring, NEXGARD won't trigger beef allergies.

### NO DINNER REQUIRED

Studies show there is no difference in plasma afoxolaner between fed and fasted dogs. ***That means there is no need to administer NEXGARD with food.***

## Satisfaction guaranteed

Like all the pet health products in the Merial family, including FRONTLINE® Plus and BROADLINE®, we want you to be completely satisfied with your NEXGARD experience.

*The treat your dogs will LOVE!*

## Stop Infestations

**NEXGARD kills fleas on your dog before fleas can lay eggs, all month long. Adult fleas, the life cycle stage you see on your pet, make up just 5% of the total flea population in the environment.**

*To prevent an infestation:*

- Give NEXGARD to your dog monthly
- Make sure all pets in your house, indoor and outdoor, are treated with a flea control product
- Remember NEXGARD is for dogs only
- Treat all pets for fleas year round – even during winter months
- Know your pet's weight and use the right size product
- Always use a product as directed by the label.

## Need more help?
